CONTENTS

Preface ix

PART I General Principles

1	Introduction	3
	A Short History of Educational Computing	3
	When to Use the Computer to Facilitate Learning	5
	The Process of Instruction	7
	Methodologies for Facilitating Learning	10
	Two Foundations of Interactive Multimedia	12
	Developing Interactive Multimedia	12
	Conclusion	13
	References and Bibliography	13
2	Learning Principles and Approaches	16
	Introduction	16
	Behavioral Psychology Principles	17
	Cognitive Psychology Principles	19
	Constructivist Psychology Principles	31
	The Constructivist–Objectivist Debate	36
	Conclusion	41
	References and Bibliography	41
3	General Features of Software for Learning	48
	Introduction of a Program	48
	Learner Control of a Program	51
	Presentation of Information	60
	Providing Help	77
	Ending a Program	78

Conclusion	81
References and Bibliography	81
Summary of General Features	85

PART II Methodologies

4	Tutorials	89
	Introduction of the Tutorial	90
	Questions and Responses	94
	Judgment of Responses	109
	Feedback about Responses	113
	Remediation	120
	Organization and Sequence of Program Segments	121
	Learner Control in Tutorials	129
	Conclusion	132
	References and Bibliography	132
	Summary of Tutorials	135
5	Hypermedia	138
	Introduction	138
	Structure of Hypermedia	141
	Hypermedia Formats	142
	The Hypermedia Database	150
	Navigation and Orientation	155
	Support for Learning and Learning Strategies	165
	Conclusion	172
	References and Bibliography	174
	Summary of Hypermedia	180
6	Drills	181
	Introduction	181
	Basic Drill Procedure	182
	The Introduction of a Drill	183
	Item Characteristics	184
	Item Selection and Queuing Procedures	189
	Feedback	198

Item Grouping Procedures	200
Motivating the Learner	204
Data Storage and Program Termination	207
Advantages of Multimedia Drills	209
Conclusion	209
References and Bibliography	210
Summary of Drills	212

7 Simulations 213

Introduction	213
Types of Simulations	214
Advantages of Simulations	226
Factors in Simulations	231
Simulation Design and Development	260
Conclusion	263
References and Bibliography	263
Summary of Simulations	269

8 Educational Games 270

Examples of Educational Games	271
General Factors in Games	277
Factors in the Introduction of a Game	280
Factors in the Body of the Game	283
Factors in the Conclusion of a Game	294
Pitfalls Associated with Creating and Using Games	296
Conclusion	298
References and Bibliography	298
Summary of Educational Games	301

9 Tools and Open-Ended Learning Environments 302

Introduction	302
Construction Sets	303
Electronic Performance Support Systems	306
Microworlds	307
Learning Tools	308
Expert System Shells	310

Modeling and Simulation Tools	313
Multimedia Construction Tools	318
Open-Ended Learning Environments	320
Conclusion	328
References and Bibliography	328
Summary of Tools and Open-Ended Learning Environments	333

10**Tests 334**

Computerized Test Construction	335
Computerized Test Administration	337
Factors in Tests	338
Other Testing Approaches in the Computer Environment	353
Security	365
Conclusion	368
References and Bibliography	368
Summary of Tests	371

11**Web-Based Learning 372**

Introduction	372
What Is the “Web” in Web-Based Learning?	373
Uses of the Web for Learning	378
Factors in Web-Based Learning	382
Concerns with Web-Based Learning	397
Advantages of Web-Based Learning	398
The Future of Web-Based Learning	399
Conclusion	399
References and Bibliography	400
Summary of Web-Based Learning	403

PART III Design and Development**12****Overview of a Model for Design and Development 407**

Introduction	407
Standards	409
Ongoing Evaluation	410

Project Management	410
Phase 1—Planning	411
Phase 2—Design	412
Phase 3—Development	412
Establishing Expectations	413
The Evaluation Form	414
Conclusion	432
References and Bibliography	432

13 Planning 437

Define the Scope of the Content	437
Identify Characteristics of Learners and Other Users	439
Establish Constraints	442
Cost the Project	454
Produce a Planning Document	463
Produce a Style Manual	466
Determine and Collect Resources	467
Conduct Initial Brainstorming	469
Define the Look and Feel of the Project	471
Obtain Client Sign-Off	474
Conclusion	480
References and Bibliography	480
Summary of Planning	481

14 Design 482

The Purpose of Design	482
The Audiences for Design Documents	483
Develop Initial Content Ideas	487
Task and Concept Analyses	492
Preliminary Program Description	499
Detailing and Communicating the Design	502
Prototypes	502
Flowcharts	503
Storyboards	514
Scripts	522
The Importance of Ongoing Evaluation	522
Client Sign-Off	523

Conclusion 524
References and Bibliography 525
Summary of Design 527

15 Development 528
Project Management 530
Prepare the Text Components 533
Write the Program Code 534
Create the Graphics 536
Produce Video 538
Record the Audio 539
Assemble the Pieces 541
Prepare Support Materials 541
Alpha Testing 548
Making Revisions 549
Beta Testing 550
Final Revisions 552
Obtaining Client Sign-Off 553
Validating the Program 553
Conclusion 557
References and Bibliography 559
Summary of Development 561

APPENDIXES

APPENDIX A Storyboard Forms 562
APPENDIX B Manuals' Content Checklists 565
Index 568
