

And Then There Were None

Chapter Summaries

Chapters 5-6:

The next morning, Mrs Rogers is discovered dead in her bed. Mr Blore puts forward the theory that Mr Rogers has killed his wife because he feared she would tell the others about the old lady they had murdered. Later, Mr Rogers tells Armstrong that two of the ten little soldiers are missing. Vera and Emily go for a walk and Emily reveals that she had sometime in the past dismissed a servant girl, who was pregnant, and that the girl had subsequently drowned herself in a river. She is not sorry for what happened. Lombard and Armstrong agree that Rogers might have killed his wife but can't believe that Marston killed himself. Lombard believes somebody killed him. Lombard reveals he has a gun and they decide to search the island for Mr Owen. They come across General Macarthur who is clearly in a deranged state of mind. They find no sign of Owen and decide he must be in the house.
