Name	Research	Limited-Field	Limited-Field	Case Listing	Item #	Description	Category name
						The age recode variable is based on Age at Diagnosis (single-year ages). The groupings used in the age recode variable are determined by the age	
						groupings in the population data. This recode has 19 age groups in the age recode variable (< 1 year, 1-4 years, 5-9 years,, 85+ years).	
						Will be in Race and Age (case data only) in rate or prevalence sessions if an alternate age is used as the population age variable.	
						See data description:	Age at Diagnosis
Age recode with <1 year olds	Yes	Yes	Yes	Yes		https://seer.cancer.gov/data-software/documentation/seerstat/nov2020/TextData.FileDescription.pdf	(or Race and Age (case data only))
						Race recode is based on the race variables and the American Indian/Native American IHS link variable. This recode should be used to link to the populations for white, black and other. It is independent of Hispanic ethnicity. For more information, see	
Race recode (White, Black, Other)	Yes	Yes	Yes	Yes		https://seer.cancer.gov/seerstat/variables/seer/race ethnicity/	Race, Sex, Year Dx, Registry, County
.,,,						includes 1= Male and 2=Female from Sex [NAACCR Item #220] plus a total of male and female. This is used to link to the correct populations for males	
Sex	Yes	Yes	Yes	Yes	220	and females when calculating sex-specific rates.	Race, Sex, Year Dx, Registry, County
Year of diagnosis	Vas	Yes	Vee	Vee	200	Year of Diagnosis: values are 1973-2014 but may be a subset depending on the file that is used and the registry that is selected. There are no unknown values on the file.	Daniel Carrotte Carrotte
real of diagnosis	Yes	ies	Yes	Yes	390	values on the im-	Race, Sex, Year Dx, Registry, County
				1		registry. This data item varies by which data file is selected. See data description:	
SEER registry	No	No	Yes	No	40	https://seer.cancer.gov/data-software/documentation/seerstat/nov2020/TextData.FileDescription.pdf	Race, Sex, Year Dx, Registry, County
						This field is used to consist a levision according according according to the first half of 2005 from these diagnosed in the second half of 2005 to link to different	
Louisiana 2005 - 1st vs 2nd half of year	No	No	Yes	No		This field is used to separate Louisiana cases diagnosed in the first half of 2005 from those diagnosed in the second half of 2005 to link to different population estimates used to account for displaced persons due to Katrina/Rita. See https://seer.cancer.gov/data/hurricane.html	Race, Sex, Year Dx, Registry, County
,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,							
						County of residence at diagnosis. This must be used in conjunction with SEER registry or use State-county variable. For more information, see	
County	No	No	Yes	No	90	https://seer.cancer.gov/manuals/2004Revision%201/SPM_AppendixA.pdf	Race, Sex, Year Dx, Registry, County
State-county	No	No	Yes	No		State and county at diagnosis. Can be used to link to the populations to produce rates at the state/county level.  This data item identifies whether or not the county of diagnosis is served by PRCDA. The primary use of this field is to be able to limit analyses of AI/AN	Race, Sex, Year Dx, Registry, County
						race to areas served by PRCDA.	
						See https://seer.cancer.gov/seerstat/variables/seer/race_ethnicity OR	
PRCDA 2017	Yes	Yes	Yes	Yes		https://seer.cancer.gov/seerstat/variables/countyattribs/	Race, Sex, Year Dx, Registry, County
PRCDA Region	No	No	Yes	No		This data item is a grouping of counties that is primarily used when working with PRCDA 2006. See	Race, Sex, Year Dx, Registry, County
PRCDA REGIOTI	INO	INO	res	INO		https://seer.cancer.gov/seerstat/variables/seer/race_ethnicity OR https://seer.cancer.gov/seerstat/variables/countyattribs/ A recode based on Primary Site and Histology in order to make analyses of site/histology groups easier. For example, the lymphomas are excluded from	Race, Sex, Fear Dx, Registry, County
						stomach and Kaposi and mesothelioma are separate categories based on histology. For more information, see	
Site recode ICD-O-3/WHO 2008	Yes	Yes	Yes	Yes		https://seer.cancer.gov/siterecode/icdo3_dwhoheme/	Site and Morphology
						Based on behavior codes in ICD-O-3. Behavior code has had the same definitions in previous versions but may be associated differently with histologies	
						over time. For example, borderline of the ovary were considered malignant in ICD-0-2 but benign in ICD-0-3. cases diagnosed in 1973-2000 were coded	
						in earlier versions and converted to ICD-O-3 and coded directly for 2001+. In situ bladder cases have been converted to malignant in this field. See	
						Behavior recode for consistency over time. For more information See data description:	
Behavior code ICD-O-3	Yes	Yes	Yes	Yes		https://seer.cancer.gov/data-software/documentation/seerstat/nov2020/TextData.FileDescription.pdf CS information is collected under the specifications of a particular schema based on site and histology. This recode should used in any analysis of AICC	Site and Morphology
						7th ed stage and T, N, M. For more information See data description:
